FEYISA GIRMA

ASPIRING NETWORK ENGINEER | CCNA TRAINED

Phone: 0951395410 | Education: 4th year IT student | Focus: Network Engineering
Languages: Afaan Oromo, Amharic, English

PROFESSIONAL PROFILE

Aspiring Network Engineer with strong foundation in networking concepts and practical experience gained through comprehensive CCNA training and hands-on lab environments. Passionate about routing, switching, VLAN segmentation, ACL security, and network troubleshooting.

STATUS & CERTIFICATION

- CCNA Training Completed | Official Cisco CCNA (200-301) Certification Pending
- 4th Year IT Student with strong academic and practical project background

CORE TECHNICAL SKILLS

- Routing: OSPF, Static & Default Routing, Inter-VLAN Routing (Router-on-a-Stick)
- Switching: VLANs, 802.1Q Trunking, Spanning Tree Protocol (STP), EtherChannel
- Services: DHCP Configuration, DNS fundamentals, NAT/PAT, NTP
- Security: Standard & Extended Access Control Lists (ACLs), Port Security, SSH Hardening
- Tools: Cisco Packet Tracer, Cisco IOS CLI, Wireshark, Windows 10, Linux CLI

KEY NETWORKING LABS COMPLETED

1. VLAN & Inter-VLAN Routing: Multi-VLAN segmentation with 802.1Q trunking on Cisco 2960.
2. OSPF Multi-Router Topology: Area 0 routing, metric cost tuning, and neighbor convergence.
3. DHCP & NAT/PAT Services: Centralized IP distribution and private-to-public IP translation.
4. Network Security with ACLs: Traffic filtering, port blocking, and host isolation.
5. Subnetting & VLSM Design: Optimized IPv4 allocation minimizing address waste.
6. Enterprise Network Simulation: End-to-end multi-tier corporate network architecture.
